COMPANY PROFILE

About Us...

WHITMORE CONSTRUCTION (WC) provides aerial, directional boring and trenching services to the cable, telecommunications and wireless industry.

Our Story...

After years in the industry, and valuable feedback from customers and partners it became clear that key partners wanted us to expand our operations from that of local to that of a regional or even nationwide operator. Our goal is to offer our commercial customers a service that focuses on all their utility construction needs.

How We Excel...

We have achieved this by offering services in-house and with resource balancing arrangements with trusted vendors, each of which is an expert in their area of responsibility and location. In short, if you have a project in our areas of coverage, the chances are very good that we have a team already in place and ready to make it happen for you.

Our Values...

The implementation, maintenance and integrity of your project is our top priority. As a company our objective is to enhance customer relationships by exceeding our customer's expectations through continuous improvement and practicing our rigorous feedback implementation policy. When we send a crew to your location you can rest assured that they are experienced, trained, fully insured and compliant with all state regulations.

Next Steps...

We would like information on becoming a prime-contractor. Yours is the type of organization we want to grow with. Please send me any information and or documents that need to be completed. I look forward to working with you and your company. Thank you.
